Portfolio

## Technical Experience

### Android Developer & Hardware Engineer

#### CaneSee (Graduation Project)

SEP 2019 - JULY 2020

Smart cane and glasses for blind people

The glasses are the part that recognizes what is in front of the user. They readsigns, recognize colors, detect objects, detect human faces and their emotions and recognize people. The cane is the part that he (sort of) touches the surroundings with its sensors. The android application is the part that notify the user by uttering any output from the glasses or the cane to the user.

### Front-End Developer (React)

#### OQLP

MAR 2020 - MAY 2020

Open Quran Learning Platform

It's an open source platform for learning the Quran. This platform connects whoever wants to recite the Quran and the teacher with each other. You can host courses on this platform also. We have done most of the work on this platform, but still not done yet.

### Back-End Developer (.NET)

#### Online Bookstore

MAR 2020 - MAY 2020

E-Commerce website for books

An e-commerce web for selling books. You can sell or buy books on this website. It was implemented with .NET framework using C# and MVC design pattern with CRUD actions.

### Front-End Developer (React)

#### Menu App

MAR 2020 - MAY 2020

E-Commerce website for books

A single page website of a restaurant menu app, I handled state mangment using React Redux. Interacted with the back-end using fetch API and for the style I used React Strap.
